FINANCE AND TRADE.

THE FINANCIAL situation remains unchanged; it is summed up in saying there | was perceptible at the conclusion of last, is abundance of exchange which banks | but by no means that busy aspect that take up readily. There is plenty of moncy, which is loaned at ten per cent, with only a moderate number of borrowers, some prairie changed hands at \$10, and The New York Times, of Monday, has some timothy at \$24 50 Bran and oats the following encouraging statement: "The changes in the statement of the associated banks are an increase of \$660,-900 in loans, \$3,324,600 in specie, \$855,100 in deposits, and \$41,700 in circulation and adversars of \$2,140,900 in legal.

Chickens were quiet at \$2,50@4,50; tion, and a decrease of \$2,140,900 in legal-tenders has performed the important function of ewing the loan market in the gold-room and re toring the equilibof the foreign exchange. The immediate effect of this has seen the improvement in our export trade resulting from the higher and firmer market for merchants' sterling. This improved condition of the faregu exchanges is very important at this juncture when the grain crops of the west are being so active y marketed. As an evidence of the great progress making in this business, we may mention that for the week ending October 30th the receipts at the lake and river ports of the west were 152 266 barrels of flour and 5,345 595 busicle of wheat and other grains. This shows a large locrease over the corresponding weeks of many previous years. At the southern ports the receipts of cotton for the week ending November 5th, were 175 144 bales—an unusually large total. These facts demonstrate the good work performed by the legal-tenders sent by the New York city tacks to the interior for weeks past, and hence the decrease in this item in the bank statement, with money so abundant, is a healthy sign." Gold was advancing again yesterday morning, the New York monet its telegram attributed the change from deslining to advancing rates to telegrams from Europe which had been rec ived asserting that Germany, Rusets and Austria were interfering in the Turkish troubles-this threatens trouble with England, which te said to have intentions upon Egypt. Au advance had been foreseen, however, independent of this acfor the New York Herald of Monday had the following: "Gold declined during the week from 1161 to 1141 and closed at 1152. The eff-ct of e election was not immediately apparent, although it is probable that the latter had something to do with the de-cline. It is still more probable that the price will advacue in the not distant future the demand for commercial purposes being good and the supply not equal to the came. Speculatively there are just now no signs of a chaus in this market, but individual parties are buying for a rise." Shalby county bonds are rather firmer. There is a steady demand for Tengessee comytroller's warrants. It is understood that the Charleston railroad bas taken up a half million of its stock; should this statement prove to be correct, the stock in the market will probably advance to a higher figure than the present quotation of 8,

There was a fair de-mand in our market, but with lower of-however, hold the opinion that receipts erings resulting in the decline shown in of hogs will not be sufficient to enable the tables below. The choice of cotton | packers to run to their full capacity for is now extended, as low and dusty bales are arriving, and promise to be only too plentiful; they are in only slight request. At the close of the market there were symptoms of recovering firmness, would be a strong one until toward the owing to moderate receipts at the ports -falling behind the previous week and the previous year-and to the firmer ecling in New York futures at the close of the market there. When the better look of things began to manifest itself, several lots that had been examined during the day were taken, so that 600 hales of cotton were sold after the official report, given below, was made The official closing quotations of Memphis cotton exchange were
